MESSAGE

The Constitution of Nepal 2072 has promulgated health as a fundamental human right. The Ministry of Health and Population (MoHP) is responsible for overall policy formulation, planning, organization and coordination in the health sector. The National Health Policy 2014, the Nepal Health Sector Strategy 2015-2020 and the Public Health Service Act 2018 provisions for quality health care delivery.

Ensuring quality health care is a major concern for the MoHP. Various initiatives have been implemented in the past to improve quality of care. The Minimum Service Standards (MSS), a self-assessment tool for hospitals will be an effective tool to ensure the enabling environment for both service providers and service users to achieve the goal of quality health care for all. The MSS focuses on the holistic aspect of hospital strengthening through improved Governance and Management, Clinical Service Management and Hospital Support Services. The MoHP in coordination with Provincial and Local governments including partners will implement MSS across all levels of health facilities for ensuring quality of health care to all citizens. The implementation of MSS demands integrated planning and budgeting in the components demanded for any service provision.

I acknowledge the leading role of Quality Assessment and Regulation Division in development of the MSS and the support provided by the partners. The MoHP remains committed in leading the successful implementation of MSS throughout the hospitals in the country.

Upendra Yadav
Deputy Prime Minister and
Minister of Health and Population

MESSAGE

The Constitution of Nepal 2015 has promulgated health as a fundamental human right. The Nepal Health Sector Strategy 2015-2020 is the guiding document for the health sector and emphasizes quality as an integral component of health service. The Public Health Service Act 2018 has also provisions of quality health care including delivery of quality Basic Health Care Services to all.

For the Ministry of Health and Population (MoHP), it is therefore essential to have the readiness standards to ensure availability for quality health care services at the point of delivery. The Minimum Service Standards (MSS) for health facilities has been instrumental in this regard. Since 2014, the MSS has been successfully implemented in all districts level hospitals which is now being planned for all levels of health facilities. Therefore, the updated standards for Primary hospitals and development of MSS for Secondary and Tertiary Hospitals will be helpful to improve the readiness for quality health services at all levels of health care. The MSS will also be an important monitoring tool for all three levels of government to plan and budget accordingly for improvement in quality of care.

I acknowledge the leading role of Quality Assessment and Regulation Division of MoHP and support of all the partners in developing the MSS. Implementing MSS and continuous monitoring will help to ensure enabling environment for quality service provision. Therefore, expansion of MSS at all levels of hospital is a priority of MoHP and I look forward for the continued support and commitment of partners in implementing the MSS.

.....

PREAMBLE

In line with the National Health Policy 2014, the Nepal Health Sector Strategy 2015-20 and its implementation plan and the Public Health Service Act 2018; the Minimum Service Standards (MSS) for Hospitals will be a milestone in improving the readiness of the hospitals to deliver quality health care service. The MSS tries to bring together the existing standards, protocols, guidelines and tools into a comprehensive document for assessment of all levels of hospitals in order to improve quality of care. The self-assessment through MSS provides information on existing gaps to be addressed in order to prepare the hospitals to deliver quality health services. It will also serve as a continuous monitoring tool for all levels of government which is crucial in ensuring quality health care in hospitals.

The standards are organized in three aspects, namely; Governance and Management, Clinical Service Management and Hospital Support Services. I hope our hospital management committees, medical superintendents, related staffs and partner organizations will use these standards for strengthening hospitals in order to improve the overall quality of care.

The contribution of Dr Dipendra Raman Singh, Chief Quality Assessment and Regulation Division and his team, and all staff involved in developing this important document is noteworthy. I would also like to acknowledge the support of the partners involved in finalizing these standards, particularly the Nick Simon's Institute, the DFID/Nepal Health Sector Support Program, and WHO Nepal for their constant effort to bring this document into its current form. I look forward for the successful implementation of MSS throughout the hospitals in the country.

PREFACE

The National Health Policy, the Nepal Health Sector Strategy 2015-20 and the Public Health Service Act emphasizes delivery of quality health care. The learnings from the implementation of MSS since 2014 at district level hospitals have been encouraging and therefore, Ministry of Health and Population (MoHP) was committed to develop MSS for all levels of hospitals. The development of the MSS for hospitals has been done through extensive consultations with MSS implementing hospitals, experts and partners. I hope that implementation of MSS will not only help to strengthen the hospital management but will also be an effective tool for monitoring the hospitals by each level of government.

The implementation of MSS will take into account evidence based planning and budgeting for the identified gaps of the hospitals. These planned investments must be aligned with each other to make the hospitals ready for the services from holistic dimension of governance, clinical service and support service management. The MoHP stays committed in supporting hospitals as relevant in addressing the gap areas and urges the financial and technical support from all level of the government. And being a rolling document the revisions and update will be regulated as per need.

I extend my heartfelt gratitude to the contribution of Dr. Dipendra Raman Singh, Chief Quality Assessment and Regulation Division and his team, provincial health directorate and all the other divisions of MoHP and DoHS for their contribution. I would also like to acknowledge the contribution of experts and partners in supporting MoHP in developing this document and hope for the continued support of all in the implementation of MSS.

FOREWORD

The Minimum Service Standards for Hospitals is a milestone for overall health system that sets in the basics for the readiness and availability of services claimed to provide. The MSS tries to bring together the existing, guidelines, tools, standards, protocols and advocates for readiness in order to improve quality care in the hospitals and thus utilization of its services.

The Minimum Service Standards (MSS) for hospitals will be an important milestone for strengthening the hospital management and health services to realize the policy commitments of Ministry of Health and Population to ensure quality health care for all. The MSS for primary hospital is the revision of the MSS for District level hospitals, while those of Secondary and Tertiary have been developed in line with the commitment in the Nepal Health Sector Strategy 2015-20.

Minimum Service Standards is a self-assessment tool to identify the readiness gaps to deliver quality health services. Following the identification of gap the action plans is developed by the hospitals for improvement. Thus developed action plans demand both financial and technical support and require proper planning and budgeting. The investments made need to be integrated to see the overall dimensions of management as structured in MSS including the Governance and Management, Clinical Service Management and Hospital Support Services.

I would like to acknowledge the contribution of Chief Quality Assessment and Regulation Division, the members of the Technical Working Group, subject experts, reviewers and technical coordinator in developing this important document. I look forward for the successful implementation of MSS throughout the hospitals in the country and hope that the learnings will be documented to inform the revision of MSS in due course of time.

Dr. Sushil Nath Pyakurel

PREFACE

The Minimum Service Standards for Hospitals was pioneered in 2014 as Minimum Service Standards for District Hospital under the Hospital Management Strengthening Program of Ministry of Health and Population (MoHP) with support from Nick Simons Institute. During inception of Minimum Service Standards (MSS), it was taken up as a living document which will be updated and revised after being rolled out nationwide, till date the MSS for District Hospitals has been rolled successfully in 83 district level hospitals. With the revision envisioned from the very beginning, the available learnings from the implementation and the federal context, the MSS for District Hospitals has been given the present shape of MSS for Primary Hospitals, while MSS for Secondary and Tertiary Hospitals have been developed.

As a person involved since the inception of the Minimum Service Standards, I can see the positive changes that MSS has brought which is visible in the MSS implementing hospitals. The change was possible only through evidence informed action plans developed from assessments which were supported by holistic dimensions of governance, clinical services and support services management covered by budgeting and regular follow up. In the development of MSS these learnings have been incorporated through robust consultations with implementing hospitals, subject experts and Technical Working Group members. Their contribution in bringing the document to its current shape is admirable. MSS is based on the principle of evidence-based activities in itself, it will be revised as per required updates.

I would like to thank Chief of Quality Assessment and Regulation Division, all the other departments of DoHS who contributed their technical expertise in developing this document. I also acknowledge the support of partners particularly, the Nick Simons Institute, DFID/ Nepal Health Sector Support Program and WHO Nepal for their assistance in this important undertaking and look forward for their continued support in implementing the MSS at all levels of Hospitals.

.....
Dr. Guña Raj Lohani
Director General
Department of Health Services

Executive Summary

Minimum Service Standards (MSS) for hospitals is the service readiness and availability of tool for optimal requirement of the hospitals to provide minimum services that are expected from them. This tool entails for preparation of service provision and elements of service utilization that are deterministic towards functionality of hospital to enable working environment for providers and provide resources for quality health service provision. MSS for hospitals reflect the optimally needed minimum criteria for services to be provide but in itself is not an “ideal” list of the maximum standards. This checklist of MSS is different than a program specific quality improvement tool as it will outline the equipment, supplies, furniture, human resource required for carrying out service but not detail out the standards operating procedures of any service.

The results of Nepal Health Facility Survey 2015 showed that among the health facilities that were assessed only 13 percent of them had all seven basic equipment items- adult weighing scale, child weighing scale, infant weighing scale, thermometer, stethoscope, blood pressure apparatus and a light source for service provision. The availability of all supplies and equipments defined for standard precaution control was as low as 0.2%, all basic laboratory services in 12% and only 3% facilities had client feedback mechanism in place. This was an alarming situation. During that period, minimum service standards was rolled out in 83 district level hospitals and was evident to contribute in quality of services provided by hospitals with instances of improved governance, management, clinical and support services. This encouraged MoHP to put on its efforts on setting the minimum service standards for hospitals secondary and tertiary levels and at the same time contextual revision of MSS for district hospitals to set MSS for primary level hospitals. The revision and development of the tool took into series of steps beginning with formulation of Technical Working Group and selection of subject experts and technical coordinator and consultative workshops and meetings (Figure: Process of MSS revision and development). The key guiding documents are Constitution of Nepal 2072, National Health Policy 2014, Policy on Quality Assurance in Health Care Services, 2064, Public Health Service Act 2075, Nepal Integrated Health Infrastructure Development Standards 2073/74, Nepal Health Sector Strategy 2015-2020 and Guideline on Health Institution Establishment, Operation and Upgrading Standards, 2070 but not limited to them.

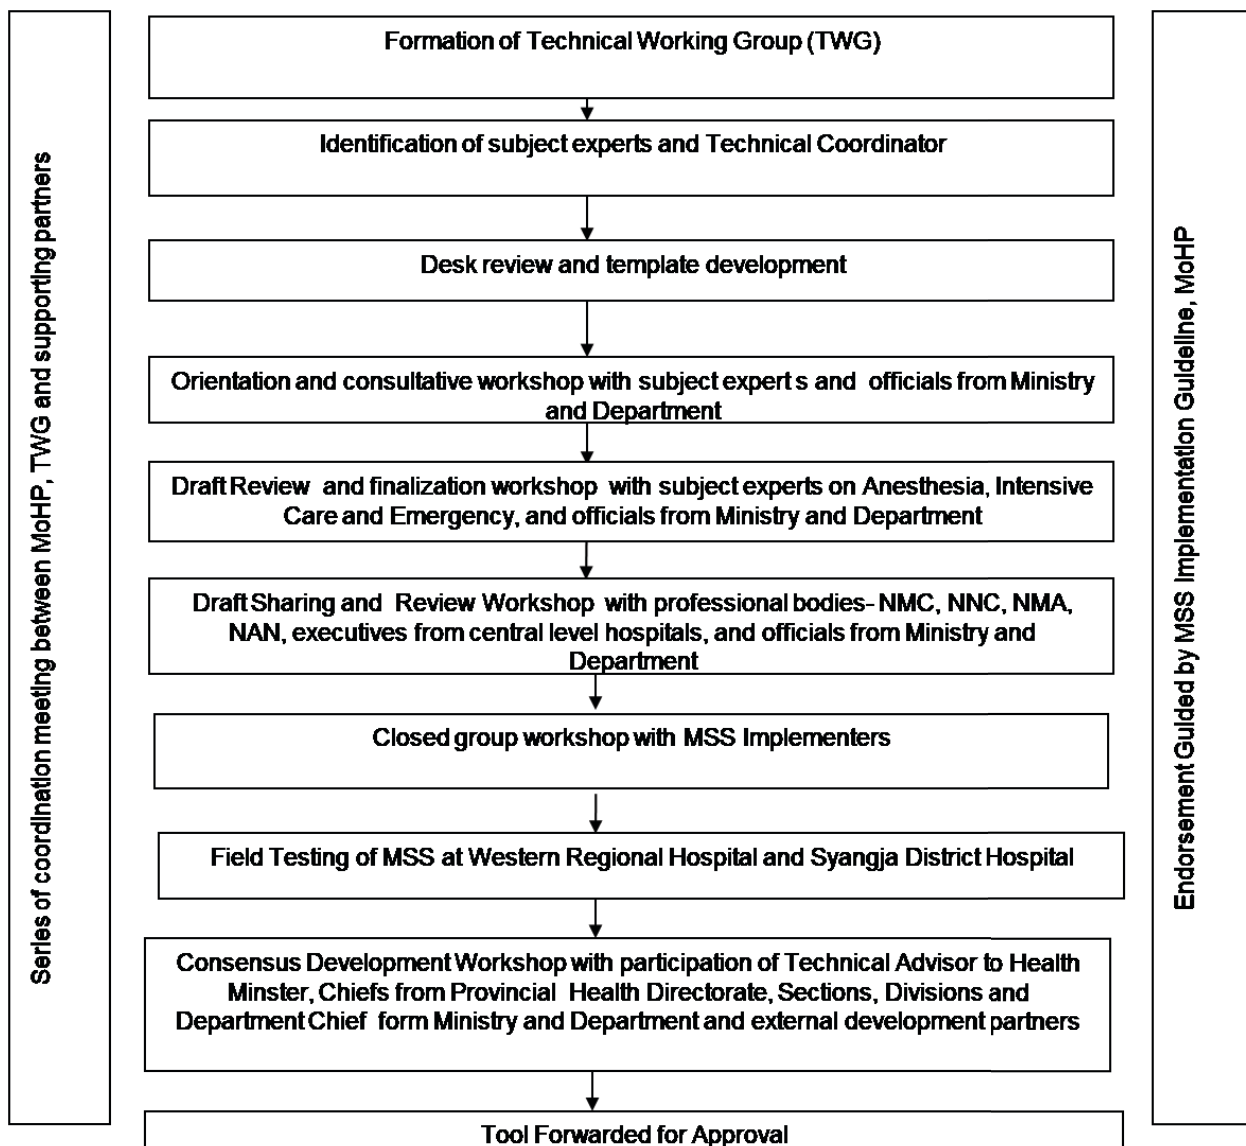

Figure Process of Revision and Development of Minimum Service Standards for Hospitals

Thus prepared MSS is a comprehensive tool for optimal preparation of the hospitals for the minimum services that are needed to be provided by these health facilities and has potential to bring a positive change. The health sector needs are dynamic and revision of the services and standards in due course is anticipated. The revision of MSS for hospitals is planned to be done every 2-3 years (completion of cycle of MSS in all targeted government hospitals) to incorporate the learning and adapt the documents to the emerging context.

The MSS tool has been organized in three major sections: Governance and Management, Clinical Service Management and Hospital Support Service Management. It has been prepared in the form of checklist that thrives for the preparedness and utilization that are fundamental to establish services towards quality. For primary hospitals, there are total 645 set of standards with total score of 759, out of which- 105 standards for measuring governance and management and has weightage of 20%, 416 standards for measuring clinical service management and has weightage of 60%, and 124 standards for measuring support service management and has weightage of 20%. Governance and management section includes the minimum standards for six subsections, clinical Service management has thirteen sub sections and hospital support service management has eleven subsections.

After assessment of all the sections of the standards, for overall scoring, each section is then weighed. The section of the governance and management (Section I) is weighed in 20%, that of clinical service management (Section II) is weighed in 60% and that of hospital support service management (Section III) is weighed in 20%. The sum of these weighed percentage of the subsections give the overall MSS score of the hospitals and based on it color code will be provided. This MSS Score for hospitals measure the existing situation and enables to identify the gap areas that are to be addressed through the development of the actions plan that demands both technical and financial inputs and managerial commitments. The overall process is guided by its implementation guideline that describes on sequences of self-assessment and follow up workshops and gap identification for action plan development and striving for optimal MSS Score.

Ministry of Health and Population strives to implement MSS in hospitals for establishing enabling environment at service delivery point through preparedness and availability for quality service provision to the users. Not being an exhaustive list of facilities and services, hospitals are encouraged to strive for betterment and go beyond the defined set of minimum standards whenever their resources support.

Background

Introduction

Minimum Service Standards (MSS) for hospitals is the service readiness and availability of tool for optimal requirement of the hospitals to provide minimum services that are expected from them. This tool entails for preparation of service provision and elements of service utilization that are deterministic towards functionality of hospital to enable working environment for providers and provide resources for quality health service provision. MSS for hospitals reflect the optimally needed minimum criteria for services to be provide but in itself is not an “ideal” list of the maximum standards. This checklist of MSS is different than a program specific quality improvement tool as it will outline the equipment, supplies, furniture, human resource required for carrying out service but not detail out the standards operating procedures of any service.

The results of Nepal Health Facility Survey 2015 showed that among the health facilities that were assessed only 13 percent of them had all seven basic equipment items- adult weighing scale, child weighing scale, infant weighing scale, thermometer, stethoscope, blood pressure apparatus and a light source for service provision. The inception of minimum service standards started with the realization to improve the curative services in rural hospitals with focus on hospital management. It began as piloting in 4-hospital in 2013 in partnership with Nick Simons Institute to support district hospital for assessment of minimum service standards using “MSS Checklist to Identify the Gaps in Quality Improvement of District Hospitals”. This has been rolled out successfully nationwide in 83 district level hospitals.

The availability of all supplies and equipments defined for standard precaution control was as low as 0.2%, all basic laboratory services in 12% and only 3% facilities had client feedback mechanism in place. This was an alarming situation. During that period, minimum service standards was rolled out in 83 district level hospitals and was evident to contribute in quality of services provided by hospitals with instances of improved governance, management, clinical and support services. This encouraged MoHP to put on its efforts on minimum service standards for hospitals.

Following the learning from the implementation of MSS and considering the current Federal context, MoHP has updated MSS for the district hospitals to make it applicable to Primary Hospitals. At the same time, MoHP has also developed the MSS for secondary and tertiary hospitals in line with the intervention planned in the NHSS-Implementation plan (2016-2021).

In developing the Minimum Service Standards for hospitals, following documents were key references:

1. National Health Policy 2071
2. Policy on Quality Assurance in Health Care Services, 2064
3. Public Health Service Act, 2075
4. Governance (Management and Operation) Act, 2064
5. Financial Procedure Regulation, 2064
6. Nepal Health Service Regulation, 2055
7. Civil Service Regulation, 2050
8. Basic Health Service Package 2075. Ministry of Health and Population, GoN
9. Nepal Health Sector strategy 2015 -2020. Ministry of Health and Population, GoN.

10. Nepal Integrated Health Infrastructure Development Standards 2073/74
11. Quality Improvement Tool for Health Facility, 2074
12. Guideline on Health Laboratory Establishment and Operation Standards, 2073
13. Implementation Guideline for Social Audit in Health Sector, 2070 Revised 2073
14. Hospital Pharmacy Service Guideline, 2070 Amended 2072
15. National List of Essential medicines 2066/67 Revised 2072/73
16. Minimum Service Standards (MSS) Checklist to Identify the Gaps in Quality Improvement of District Hospitals, Curative Service Division, MoHP, GoN, 2071/72
17. Guideline on Health Institution Establishment, Operation and Upgrading Standards, 2070
18. Transaction Accounting and Budget Control System (TABUCS) Users' Guide, 2070
19. Guideline for Health Management Information System, Recording and Reporting, 2070
20. Job Description of Staffs of Regional Health Directorate and District Health and Public Health Offices, 2070
21. Operational Procedure of Department of Health Services, 2068
22. Implementation Guideline Quality Improvement of Health Services, 2066
23. Infection Prevention Reference Manual (District Hospital and Health Facility), 2066
24. National Medical Standard for Reproductive Health, Vol. III, 2063/64
25. National Safe Motherhood and Newborn Health Program District Maternal and Neonatal Health Need Assessment Toolkit Vol. 1, Hospital, 2063/64
26. Health care waste management guideline, 2014. Ministry of Health and Population. Government of Nepal
27. Hospital management practices observed in 83 District and upgraded hospitals.
28. Series of consultation Workshops, Technical Working Group meetings and consultation of subject experts.

Besides these, literature related to health facility readiness and availability, and quality of care were visited by the consultant, technical coordinator, subject experts and TWG members and contextual reality were given priority during the development of the MSS tools.

The Minimum Service Standards have been defined considering the existing organizational structure of the hospitals, provision of human resources and financing capacity. The defined standards basically focus on the readiness of hospitals towards ensuring the delivery of quality health services. However, hospitals are encouraged to strive for betterment and go beyond the defined set of minimum standards whenever their resources support. The health sector needs are dynamic and revision of the services and standards in due course is anticipated. The revision of MSS for hospitals is planned to be done every 2-3 years (completion of cycle of MSS in all targeted government hospitals) to incorporate the learning and adapt the documents to the emerging context.

Process of Minimum Service Standards Development

Formation of Technical Working Group (TWG)

A Technical Working Group was formed by MoHP to develop the Minimum Service Standards (MSS) for Hospitals with involvement of the then curative service division, related sections and departments and experts from the external development partners.

The TWG comprised of the following members as per previous MOHP structure and the members continued till finalization of the document:

- Chief, The then Curative Service Division, MoHP- Coordinator
- Chief, Public Health Administration, The then Monitoring and Evaluation Division, MoHP- Member
- Medical Generalist, MoHP- Member
- Executive Director, Health Insurance Board- Member
- Chief, The then Nursing Section, MoHP- Member
- Under Secretary, The then Curative Service Division, MoHP- Member
- Chief, The then Quality Section of Management Division- Member
- Representative, World Health Organization, Nepal- Member
- Representative, DFID/Nepal Health Sector Support Program- Member
- Representative, Nick Simons Institute- Member
- Section Chief, The then Curative Service Division, MoHP- Member Secretary

Identification of subject experts and technical coordinator

As per the agreement of the TWG members and the learning from MSS implementation in district hospitals, it was agreed to divide the MSS into three sections namely; Governance and Management, Clinical Service Management and Hospital Support Service Management. With series of meetings among the TWG members, subject experts (Annex I- List of Subject Experts) were identified for consultation in specific sections of the service standards under the leadership of the then Curative Service Division. They also developed term of reference for technical coordinator who would be a liaison among MoHP, partners and subject experts for the prosecution of the task.

Desk review and template development

Technical coordinator (TC) for the work supported TWG for the development of the templates for revision of the minimum service standards for primary, secondary and tertiary hospitals with desk review of the key guiding documents (as listed in background) and service availability and readiness tool of World Health Organization (WHO). Thus developed templates were shared with the subject experts. All the subject experts were coordinated by TC for preparing the zero draft of the MSS and TWG moved on to the next step of consultative workshops.

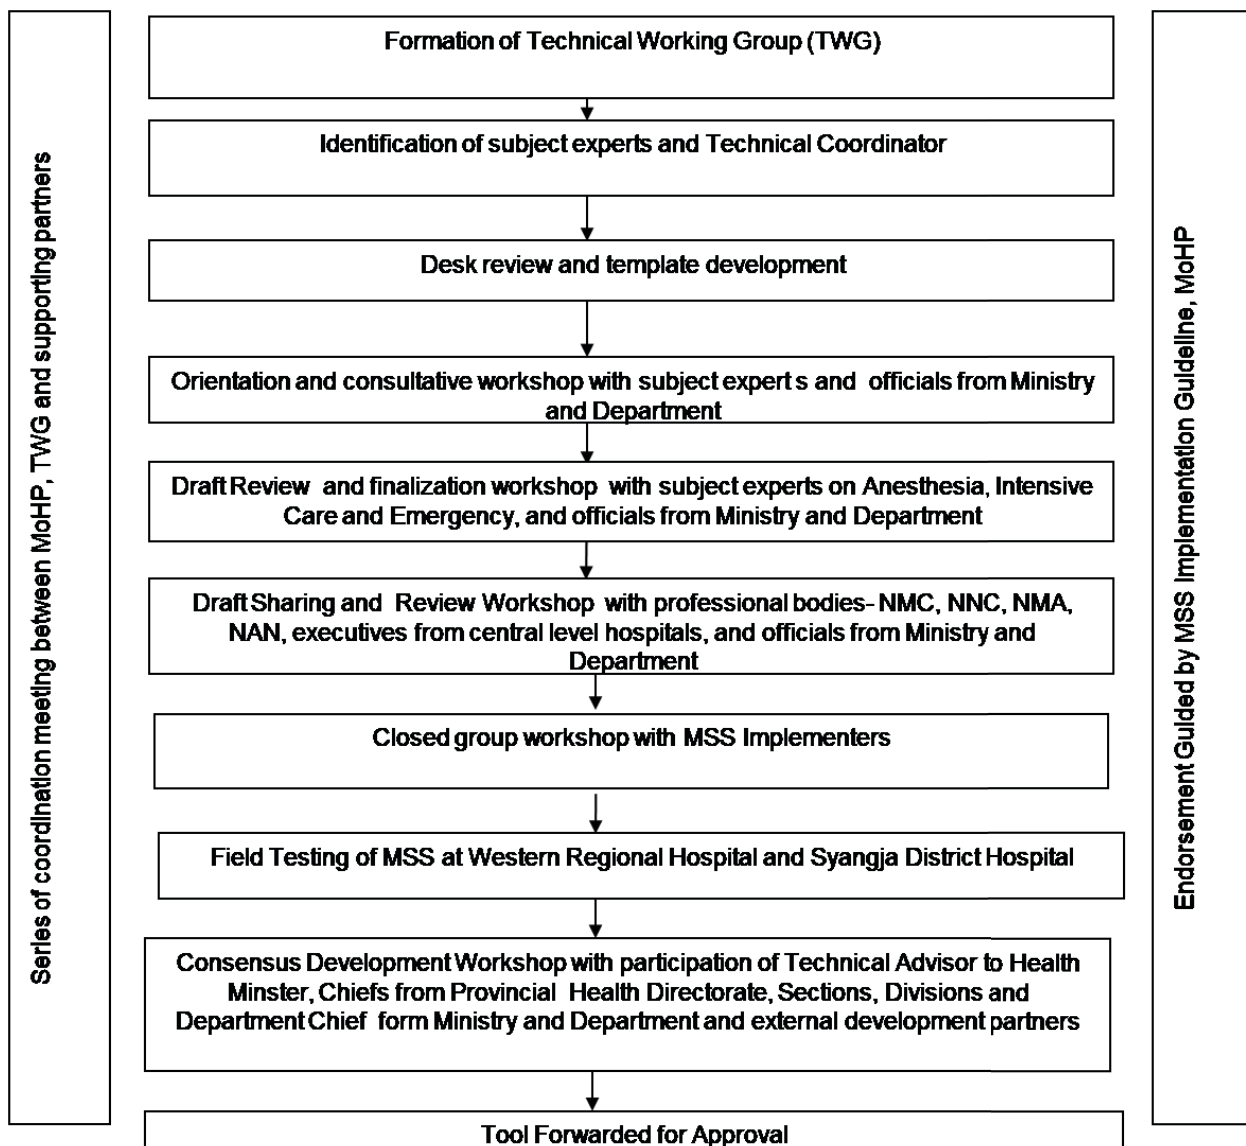

Figure Process of Revision and Development of Minimum Service Standards for Hospitals

Series of coordination meeting between MoHP, TWG and supporting partners

Series of coordination meeting were conducted by MoHP for the discussion of action points with TWG members and supporting partners for MSS. Being based on identified need the consultative workshops, their modality and participants were finalized.

Orientation and consultative workshop

For orientation and consultative workshop, participants were subject experts and consultant doctors, government officials from department, sections and divisions of MoHP, representatives from various academic institutions, different regional, zonal and district level hospitals and partner agencies. There were around 62 participants in the workshop addressed by Health Secretary, MoHP. Subject experts from tertiary center, regional, zonal and district hospitals of the country shared their valuable experience of understating and working for minimum service standards while being part of the district level hospitals during their service. From the workshop, revision of MSS for primary level and development of MSS for secondary and tertiary hospitals was guided to be service oriented leading to a comprehensive practical tool for institutionalizing readiness and

service availability in the hospitals. Technical coordinator shared the draft one with the TWG team and critical areas for intensive work out identified were- intensive care units, anesthesia, emergency and public health perspective. Being based on the critical areas identified, modality for further steps was contextualized and Review Workshop I was planned with experts for working in identified critical areas.

Draft review and finalization workshop

For review and finalization workshop, there were around 25 participants including members of TWG, government officials from the then Curative Service Division, Management Division, subject experts on intensive care, anesthesia and emergency services from academic institutions, professional bodies and hospitals, and experts from partner agencies. The inputs from the workshop on was on format of tool to arrange the supporting annex immediately followed by standards and sequence of the annexes used along with standards to be uniformly allocated as furniture, equipment, instrument and supplies for making it user friendly. The technical inputs were received in all three thematic areas with special inputs on intensive care, anesthesia and emergency services; also contextualization of the ratio of health workforce for services was done during the workshop. The feedback were incorporated by TC to develop draft second of the MSS. Technical coordinator shared the draft second with the TWG team and draft sharing review workshop II with the professional councils and associations, representatives from central level hospital was planned.

Draft sharing and review workshop

For draft sharing and review workshop, there were around 35 participants who were representatives from Nepal Medical Council, Nepal Nursing Council, executives from central level hospitals, representatives from Nepal Medical Association, Nepal Nursing Association and Society of Public Health Physician Nepal. It was identified during the workshop that there is requirement of division of the clinical service components of primary hospitals at least into two sections of less than 50 beds and 50 beds to 100 beds for the ease of the relevancy of the services available. Also final format for the tool was decided to be addressing- area, its component, verification having the service standards. Being based on the inputs from workshop, separate MSS for primary hospitals with general service and primary hospitals with specialized services were drafted. And additional consultation was done with identified nephrologist, neurologist, gastrologist and burn/plastic surgeon for additional services in tertiary hospitals who were consulted by TC for technical inputs and thus draft third of the MSS was prepared. Closed group workshop with MSS implementers for proof reading and appraisal of practical aspects of the MSS was planned.

Closed group workshop with MSS Implementers

For closed group workshop with MSS implementers, participants were members of TWG, team of implementers working as district health support program officers of partner organization who were working closely with the district hospitals for MSS implementation. In the workshop, each of the standards were reviewed and their practical experiences were shared and documented. The tool was assessed for user-friendliness and inputs were incorporated related to directions of use of the tool was added in places where there were checklists and annexes followed by the standards. Feedback were incorporated by TC to develop draft fourth of the MSS which was presented to TWG. This draft was then used for field testing.

Field Testing of MSS

For field testing, the working team was composed of TWG members and coordinated by TC. Field testing was done in Western Regional Hospital, Pokhara and Syangja District Hospital. The hospital staffs of both the hospitals were given brief presentation by TWG member and further facilitated with help of Hospital Director at Western Regional Hospital and Medical Superintendent at Syangja District Hospital respectively. The department/unit heads were consulted and the tool was thoroughly read by them and marked as agreeable to

them for assessing the readiness and availability of any services they are giving and asked about its practicable aspects. After incorporation of feedback, final draft were shared by TC with TWG and further shared with sections and department chiefs of MoHP and a consensus development workshop was planned.

Consensus Development Workshop

For consensus development workshop, the working team was composed of TWG members, TC and coordinated by Quality Assurance and Regulation Division (QARD). There were around 35 participants representing the different sections, Department of Health Service, Department of Drug Administration, Department of Ayurveda, and Divisions of MoHP, representatives from provincial health directorate and representatives of partner organization. Consensus was developed in most of the content of the MSS and its implementation guideline was recommended to be in line with the federal context. Feedback received was focused on the practical aspect of the MSS and it was put forward as paving the road towards quality of care. After incorporation of feedback, final tools were shared by TC with TWG and further shared to Health Secretary of MoHP for further approval.

After approval of the standards from MoHP, the implementation of the MSS will be guided by the "Minimum Service Standards Implementation Guideline 2075."

Organization of the Standards

The overall service standards are categorized in three major sections: governance and management, clinical service management and hospital support service management. There are total 645 set of standards with total score of 759, out of which- 105 standards for measuring governance and management and score of 109 and this has weightage of 20%, 416 standards for measuring clinical service management and score of 518 and this has weightage of 60%, and 124 standards for measuring support service management and score of 132 and this has weightage of 20%.

Section I: Governance and management

Strengthening Governance and Management is a key to provide the enabling environment in hospitals for service providers and users. This section includes the minimum standards for the following subsections:

- 1.1. Governance
- 1.2. Organizational management
- 1.3. HR management and development
- 1.4. Financial management
- 1.5. Medical records and information management
- 1.6. Quality improvement

Section II: Clinical Service Management

In order to ensure quality of care at the point of delivery, the implementation of clinical service standards is essential. As per IHIDP primary hospitals have been divided into different types based on the bed capacity ranging less than 50 beds are included as primary with general services. Primary with general services has following clinical areas of service delivery:

- 2.1. Outpatient services (General Medicine, Obstetrics/Gynecology and General Surgery)
- 2.2. Special Clinics (Immunization and growth monitoring; family planning; Anti-tubercular treatment (ATT), anti-retroviral treatment (ART), Safe Abortion Services)
- 2.3. Emergency Service

- 2.4 Dressing, Injection and Routine Procedure (DIRP)
- 2.5 Hospital Pharmacy Service
- 2.6 Inpatient Service (General Inpatient Ward)
- 2.7 Maternity Services (Delivery Service, Maternity Inpatient Ward)
- 2.8 Surgery/ Operation Service
- 2.9 Diagnostics and investigations (Laboratory and walking blood bank, X-ray, USG, ECG)
- 2.10 Dental Services
- 2.11 Postmortem Services
- 2.12 Medico-legal Services

Section III: Hospital Support Service Management

Implementing the standards for Hospital Support Services is equally important to avail and support delivery of quality clinical services. This section includes minimum standards under the following subsections:

- 3.1. CSSD
- 3.2. Laundry
- 3.3. Housekeeping
- 3.4. Repair and maintenance, power system
- 3.5. Water supply
- 3.6. Hospital Waste Management
- 3.7. Safety and Security
- 3.8. Transportation and Communication
- 3.9. Hospital Canteen
- 3.10. Store (Medical and Logistics)

How to use this Checklist?

The MSS for hospitals is a self- assessment tool. Each standard has set of dimensions with one or more verification criteria which are assessed. The checklist enables hospitals to measure the existing situation in through scoring and helps to identify the gap areas to be addressed through the development of the actions plans. This is a cyclical process and its details are explained in the implementation guideline and users' guide for further understanding of assessment, process of action plan development and follow up of improvement from baseline. The key steps are as follows:

Group discussion

- Conduct a group discussion in your hospital to see if the hospital really meets the given standards under each section.

Filling the checklist

- Read each section carefully and if your hospital meets the given standards, please score from 0 to 3 in the column of the score based on the maximum score for that standard
- For areas where there is indication of checking annex, please calculate the percentage and follow the scoring chart for scoring from 0 to 3
- For areas where there is indication of checking the checklist, please use both the standard and checklist for getting the clear picture of that standard
- Please use individual copies for each department/unit wherever applicable so that there is least biasness in the assessment
- Complete this process for all the standards

Scoring the checklist

- In each section, add the total score and convert it into percentage.
- Calculate the average of the percentages obtained in its sub-section to obtain the score of a section
- Do this to all three sections to obtain the scores of each section and then take the weightage for calculating the overall MSS score of the hospital

Sample of filling the tool

Area	Code	Verification		
CSSD	3.1			
Components		Standards	Obtained Score	Maximum Score
3.1.1 Space	3.1.1.1	Separate central supply sterile department (CSSD) is available. with running water facility	1	1
	3.1.1.2	There are separate rooms/ space allocated for dirty and clean utility.	1	1
3.1.2 Staffing	3.1.2	Separate staffs assigned for CSSD under leadership of trained nursing staff	1	1
3.1.3 Equipment and supplies for CSSD	3.1.3	Equipment and supplies for sterilization available and functional round the clock (See Annex 3.1a CSSD Equipment and Supplies at the end of this standard)	2	3
3.1.4 Preparing consumables	3.1.4	Wrapper, gauze, cotton balls, bandages are prepared.	1	1
Standard 3.1		Total Score	6	7
		Percentage = Total Score / 7 x 100= 6/7x100	85.7%	

Annex 3.1a CSSD Equipment and Supplies			
SN	Items	Required No.	Score
1.	Working Table	3	1
2.	Trolley for Transportation	2	0
3.	Steel Drums	10	0
4.	Autoclave Machine (250 liter, pre-vacuum, with horizontal outlet)	2	1
Total Score			3
Total Percentage = 3/4 X 100			75

Each row gets a score of **1** if all the required number is available otherwise **0**.

70-85	2
85-100	3
Score for Standard 3.1.3	2

Weightage of the sections and Overall MSS Score

After assessment of all the sections of the standards, for overall scoring, each section is then weighed. The section of the governance and management (Section I) is weighed in 20%, that of clinical service management (Section II) is weighed in 60% and that of hospital support service management (Section III) is weighed in 20%. For example:

If Section I has the overall score of 80%, Section II has 60% and Section III has 80%; the overall score of the hospital for MSS assessment is calculated as:

$$\text{Overall MSS Score} = (0.2 \times \text{Section I} + 0.6 \times \text{Section II} + 0.2 \times \text{Section III})\%$$

$$\text{Overall MSS Score} = (0.2 \times 80\% + 0.6 \times 60\% + 0.2 \times 80\%)$$

$$\text{Overall MSS Score} = 68\%$$

Interpretation of the MSS scores

The overall idea of the MSS score is that it is the minimally required optimal readiness of the hospitals to provide the available services. And moving towards the obtaining 100% in all individual sub-sections and overall MSS score is the requirement to thrive a step ahead towards quality service provision. The scores for any sub-sections being less than fifty (<50) is taken as very poor and alarming and needs to be addressed first. The scores from fifty to less than seventy (50 to <70) are taken as the state of improving status that needs specific targeted areas support. The scores from seventy to less than eighty five (70 to <85) indicate acceptance level that requires careful specific interventions. And from eighty five percentages onwards is optimal level of the readiness of the hospitals to provide the available services that requires sustained efforts to maintain the level and move towards 100%.

Overall MSS Score and Color Coding

Being based on the overall MSS score (%) obtained, the color coding of the health facilities will be done as follows:

MSS overall score (%)	Color Code	
Less than 50	White	
50-70	Yellow	
70-85	Blue	
85-100	Green	

In the above example the overall MSS score is 68%, thus health post will be categorized in yellow color zone. It will be provided with the yellow flag as its color code for MSS score.

Section I: Governance and Management Standards

Score of Section I			
(Average of the percentage obtained = Sum of percentage obtained in each sub-section/ Number of sub-section (6))			

Area	Code	Verification		
Governance	1.1			
Components		Standards	Obtained Score	Maximum Score
1.1.1 Formation of Hospital Management Committee (HMC)	1.1.1	Hospital Management Committee is formed		1
1.1.2 Capacity building of HMC	1.1.2	All HMC members have received an orientation on HMC functions		1
1.1.3 Availability of Medical Superintendent	1.1.3	Medical Superintendent is fulfill as per organogram		1
1.1.4 Functional HMC	1.1.4.1	HMC meetings called upon by member secretary / Medical Superintendent headed by chairperson conducted at least 3 times per year or as per need		1
	1.1.4.2	HMC meetings have covered at least following agenda (See minutes of last meetings):		
	1.1.4.2.1	Hospital services and utilization		1
	1.1.4.2.2	Hospital's financial issues		1
	1.1.4.2.3	Patient rights issues e.g. patient facilities, analysis of complaints received, patient security		1
	1.1.4.2.4	Management issues- HR issues, security issues		1
	1.1.4.2.5	Infrastructure/ Equipment issues		1
	1.1.4.2.6	Coordination issues with local governance- rural municipality/ municipality, provincial, federal, DoHS, MoHP		1
1.1.5 Support in health financing	1.1.5.1	Hospital implements health insurance program		1
	1.1.5.2	All targeted women receive Aama Surakhsya program incentives on time (in last quarter)		1
1.1.6 Annual plan & budget	1.1.6	Annual plan & budget is approved by HMC before the fiscal year starts		1
1.1.7 Storage of HMC documents	1.1.7	There is a separate locker for HMC documents.		1

1.1.8 Accountability	1.1.8.1	Updated citizens charter is displayed		1
	1.1.8.2	Notices of public concern are displayed publicly		1
	1.1.8.3	Complaint boxes are kept in a visible place		1
	1.1.8.4	Information officer opens complaint box at least once a week and issues are timely addressed		1
	1.1.8.5	Hospital has a website or social media account like- Facebook, Viber or Twitter- available and functional with latest information		1
	1.1.8.6	Hospital has geriatrics friendly infrastructure (like side rails for mobilization and support)		1
	1.1.8.7	Hospital has friendly environment for people with disability (like ramps)		1
1.1.9 Grievance and complain handling	1.1.9.1	Mechanism for grievance and complain handling institutionalized		1
	1.1.9.2	Grievance and complains are effectively addressed		1
1.1.10 Hospital has operational manual	1.1.10	Hospital its own operational manual with clear information on how the hospital operates its' services		1
1.1.11 Hospital produces an Annual Report	1.1.11	Hospital Annual Report is available in website		1
1.1.12 Conduct social audit	1.1.12	Social audit is conducted for last year		1
Standard 1.1		Total Obtained Score		27
		Percentage = Total Obtained Score / 27 x 100		

Area	Code	Verification		
Organizational Management	1.2			
Components		Standards	Obtained Score	Maximum Score
1.2.1 Organizational structure	1.2.1.1	Organogram of hospital showing departments/units with number of staffs is displayed		1
	1.2.1.2	Organogram of hospital is reviewed every 2 years and forwarded to higher authority		1
1.2.2 Work division and delegation of authorities	1.2.2	Written delegation of authorities is maintained		1
1.2.3 Maintaining client flow system	1.2.3	Navigation chart with services and departments guiding clients to access services		1
1.2.4 Queue system	1.2.4	Hospital implements token and / or queue system for users (separate for elderly, disable and pregnant)		1

1.2.5 E-Attendance	1.2.5	All staffs of hospital use electronic attendance		1
1.2.6 Dress code for all staffs	1.2.6.1	All clinical, technical and administrative staffs have apron / uniform which is worn on duty		1
	1.2.6.2	All hospital staffs carry personal ID cards when on duty		1
1.2.7 Maintaining effective team work environment	1.2.7.1	Hand-over meetings are conducted daily and also in concerned department		1
	1.2.7.2	Morning conference is conducted everyday		1
	1.2.7.3	Regular meetings are conducted as follows (see meeting minutes):		
	1.2.7.3.1	Intra- departmental meeting every two weeks		1
	1.2.7.3.2	Inter-departmental meeting once a month		1
	1.2.7.3.3	Staff meeting once a month		1
	1.2.7.4	Staff quarters are provided and adequate for the staffs		1
	1.2.7.5	Separate space allocated for breast feeding for staffs/ Separate space in duty room designated for breast feeding		1
Standard 1.2	Total Obtained Score			15
	Percentage = Total Obtained Score / 15 x 100			

Area	Code	Verification		
Human Resource Management and Development	1.3			
Components		Standards	Obtained Score	Maximum Score
1.3.1 Personnel administration policy of hospital	1.3.1	Personnel administration guideline of HMC is available (for all staffs including locally hired staff) and practiced accordingly		1
1.3.2 Human resource records	1.3.2	Individual records of all staffs including contract staffs are maintained and updated.		1
1.3.3 Staffing	1.3.3.1	Staffs available for service in hospital as per organogram (See Annex 1.3a Functional Organogram Section I: At the end of this standard)		3
	1.3.3.2	<i>Maaga Akriti</i> form (माग आकृति फारम) correspondence to fulfill vacant positions to concerned authority as per guideline		1
1.3.4 Job description	1.3.4	All staffs including HMC staffs are given a job description when they are recruited/ posted to the hospital (permanent and contract staff)		1

1.3.5 Review of performance	1.3.5.1	Performance appraisal (का.स.सु.) of all staffs is done as per guideline		1
1.3.6 Motivating staff and occupational safety	1.3.6.1	A training plan for the hospital is developed based on the training needs of the staff identified at the performance appraisal		1
	1.3.6.2	For training and related activities, at any point of time, the acceptable work absenteeism is <10% of staff		1
	1.3.6.3	There is activity conducted to motivate staff (staff retreat, rewards, recognition of performances, etc.) at least once a year.		1
	1.3.6.4	Hospital has system for addressing occupational hazard like needle stick injury, radiation exposure, vaccination		1
1.3.7 Continuous professional development (CPD)/ Continuous medical education (CME)	1.3.7.1	Hospital conducts CPD / CME classes to technical staff weekly		1
	1.3.7.2	Written record of attendance, subjects presented and discussed during CPD/CME		1
	1.3.7.3	Separate space with furniture, audio-visual aids and internet for CPD/CME/meeting are available.		1
1.3.8 Library facility available	1.3.8.1	Hospital has space designated for library with sitting arrangement for readers		1
	1.3.8.2	A list of national health guidelines and treatment protocols available and inventory managed for readers accessing it		1
	1.3.8.3	Computers with printing and photocopy facility available		1
	1.3.8.6	Access to internet facility with institutional access to at least one of the international health related domain like HINARI		1

Emergency Service	2.3	Standards		
Components				
2.3.1 Time for patients	2.3.1	Emergency (ER) room/ward is open 24 hours		1
2.3.2 Staffing (per shift in ER)*	2.3.2.1	For 5 ER beds (Doctor on duty: Nurse: Paramedics: Office Assistant = 1:1:1:1)		1
	2.3.2.2	The doctor, nurse and paramedics should take PTC, ETM, BLS and ACLS ¹ training.		1
2.3.3 Physical facilities	2.3.3.1	10% of the total hospital beds are allocated for ER of which 1% for red, 2% for yellow, 3% for green and 1 % for black color coded		1
	2.3.3.2	Adequate furniture and supplies (See Annex 2.3a Furniture and General Supplies for ER At the end of this standard)		3
	2.3.3.3	Light and ventilation are adequately maintained.		1
	2.3.3.4	Designated area for nursing station centrally placed in ER and all beds visible from nursing station		1
	2.3.3.5	Space allocated for duty room and changing room separate for male and female staffs with facilities of tea room		1
	2.3.3.6	Separate toilets for staffs at least one each- male, female and universal		1
	2.3.3.7	Separate land line/ mobile phone for emergency		1
2.3.4 Instruments/ equipment	2.3.4	Instruments and equipment to carry out the ER works are available and functioning (See Annex 2.3b ER Instruments and equipment At the end of this standard)		3

1 PTC- Primary Trauma Care, ETM- Emergency Trauma Management, BLS- Basic Life Support, ACLS- Advanced Cardiac Life Support

2.3.5 Medicines and supplies	2.3.5.1	Medicines and supplies to carry out the ER works are available (See Annex 2.3c Medicines and supplies for ER At the end of this standard)	3
	2.3.5.2	Emergency stock of medicines and supplies for mass casualty management	1
2.3.6 Triage	2.3.6.1	Hospital maintains a triage system in the ER with 24 hours triage service	1
	2.3.6.2	Triage category board and information to the public (Red, Yellow, Green) (descriptive flex)	1
2.3.7 Emergency protocol in place	2.3.7.1	In red area one of the bed is Resuscitation bed with availability of emergency crash trolley with emergency lifesaving drugs, cardiac monitor, non-invasive ventilator, oxygen concentrator	1
	2.3.7.2	Development of 001 or Blue code call system whenever any patient visited in Emergency collapses and need immediate and urgent emergency care	1
	2.3.7.3	Emergency disposition of the patient either in observation ward or definite care ward or referral or discharge within 3-6 hours	1
	2.3.7.4	Critical patient transfer from emergency to OT or Inter-hospital transfer is accompanied at least by paramedics or Nurse for handover of patient	1
2.3.8 Maintaining patient privacy	2.3.8	Appropriate methods have been used to ensure patient privacy (separate rooms, curtains hung)	1
2.3.9 Security	2.3.9	The hospital has maintained security system for ER for 24 hours with CCTV coverage	1
2.3.10 Mass casualty/ disaster preparedness	2.3.10.1	The hospital has mass casualty management protocol, and all staffs are updated with well labeled direction, prepositioning clipboards	1
	2.3.10.2	Disaster area identified with adequate furniture to carry out Triage in case of disaster	1
	2.3.10.3	Hospital carries out at least one mock drill and disaster preparedness once a year	1
2.3.11 Duty rosters	2.3.11	Duty rosters of the ER are developed regularly and available in appropriate location	1
2.3.12 Maintaining inventory	2.3.12	Separate inventories for emergency lifesaving drugs/equipment and narcotics are maintained	1
2.3.13 Securing narcotic drugs	2.3.13	Narcotic drugs are kept separately and securely with mandatory recording system	1
2.3.14 Facilities for patients	2.3.14.1	Safe drinking water is available 24 hours	1
	2.3.14.2	Hand washing facility with running water and liquid soap	1
	2.3.14.3	There are at least 3 toilets with hand washing facilities (1 for males, 1 for females, and 1 universal) for every 10 ER beds and for additional beds increase proportionately for male and female	1

2.3.15 Decontamination area	2.3.15	Decontamination area specified and practiced		1
2.3.16 Infection prevention	2.3.16.1	Staff wear mask and gloves during work		1
	2.3.16.2	There are clearly labeled colored bins for waste segregation and disposal as per HCWM Guideline 2014 (MoHP)		1
	2.3.16.3	Needle cutter is used		1
	2.3.16.4	Chlorine solution is available and utilized for decontamination		1

Hospital Pharmacy Service	2.5			
Components		Standards	Obtained Score	Maximum Score
2.5.1 Pharmacy unit available	2.5.1	Hospital has designated pharmacy unit		1
2.5.2 Governance committee for hospital pharmacy services	2.5.2.	Governance committee for hospital are formed based on hospital pharmacy-service guideline:		
	2.5.2.1	Drug and Therapeutic committee (DTC)		1
	2.5.2.2	Hospital pharmacy operation committee		1

2.5.3 Hospital formulary Heading: Availability of medicines and supplies	2.5.3.1	Hospital has prepared formulary list based on Nepalese National Formulary (NNF) approved by DTC		1
	2.5.3.2	Hospital pharmacy has all free drugs available round the clock (*refer to free drug list of government for hospitals)		1
	2.5.3.3	Hospital formulary list includes all medicines and supplies as per services provided by hospital		1
	2.5.3.4	Hospital has all ,medicines and supplies available as per approved hospital formulary list		1
2.5.4 Good procurement practice	2.5.4.1	Annual procurement plan for medicines and supplies for pharmacy services is available		1
	2.5.4.2	Procurement is done based on public procurement guideline		1
	2.5.4.3	Product specification for each medicine and related supplies of approved formulary list is available		1
	2.5.4.4	Technical criteria on quality assurance of procured medicines is included in tender document		1
	2.5.4.5	Certificate of analysis (CoA) from manufacturer of each batch of procured medicine is available		1
	2.5.3.4	Selling price of the drugs does not exceed 20% of the procurement price		1
2.5.4 Pharmacy service hours	2.5.4	The pharmacy is open 24x7		1
2.5.5 Staffing as per hospital pharmacy service guideline 2072	2.5.5.1	Pharmacy unit is led by at least one pharmacist		1
	2.5.5.2	Pharmacy has at least one assistant pharmacist and one office assistants in each shift		1
	2.5.5.3	Duty roster of pharmacy to cover 24 hours service is prepared and visibly placed		1
2.5.7 Display of list of free medicines	2.5.7	The list of free medicines is displayed in a clearly visible place.		1
2.5.8 Availability of medicines for specific programs	2.5.8	All of the required medicines and supplies for specific programs are available in pharmacy (less than 50%= 0; 50-70 =1, 70-85=2 85-100= 3)		3
2.5.9 Inpatient pharmacy services available	2.5.9	Hospital pharmacy directly supplies inpatient medicine and supplies to wards and OT		1
2.5.10 Electronic record keeping	2.5.10	Pharmacy uses computer with software for inventory management and medicine use		1
2.5.12 Pharmacy stock available	2.5.12	Number of items of hospital formulary stocked in pharmacy(less than 50%= 0; 50-70 =1, 70-85=2 85-100= 3)		3

2.5.13 Display and storage of medicines	2.5.13.1	All the medicines and supplies are displayed in clean racks following either alphabetical orders and generic names or grouping as use	1
	2.5.13.2	Temperature of pharmacy is monitored and recorded and is maintained in range of (25+/- 2°C)	1
	2.5.13.3	Functional freeze +/-4°C for thermolabile medicine	1
2.5.14 Information to patients	2.5.14.1	Pharmacy department has its allocated separate information and counseling unit with reference books or e-books	1
	2.5.14.2	Information regarding the medicines is provided to the patients.	1
	2.5.14.3	IEC materials (posters, leaflets, national hospital formulary) about the appropriate use for medicines are available in the pharmacy area.	1
2.5.15 Generic prescription	2.5.15	Hospital has pre-printed list of medicines for generic prescription available	1
2.5.16 Dispensing medicines	2.5.16.1	Medicine is dispensed using electronic billing with barcode system	1
	2.5.16.2	Each medicine is given with written instructions on how to take	1
2.5.17 First Expiry First Out (FEFO)	2.5.17	FEFO system is maintained using standard stock book/cards.	1
2.5.18 Pharmacy Inventory	2.5.18	Every month, all medicines and supplies are counted, out- of-date discarded, and tallied with the medical store.	1
2.5.19 Drug utilization review and quantification of data	2.5.19.1	Pharmacy department operates pharmacovigilance activities and adverse drug reaction (ADR) Reporting	1
	2.5.19.2	Pharmacy department conducts studies on drug utilization and quantification	1
2.5.20 Pharmaceutical waste disposal	2.5.20	Pharmaceutical waste (expired or unused pharmaceutical products, spilled contaminated pharmaceutical products surplus drugs, vaccines or sera, etc) management is done based on HCWM guideline or returned to the supplier on time	1

Diagnostics and laboratory	2.9	Verification		
<i>Laboratory and blood bank</i>	2.9.1			
Components		Standards	Obtained Score	Maximum Score
2.9.1.1 Time for patients	2.9.1.1.1	Laboratory is open from 10 AM to 3 PM and emergency laboratory services available round the clock		1
	2.9.1.1.2	Basic investigations are available (See Annex 2.9.1a List of investigations for Laboratory At the end of this standard)		3
	2.9.1.1.3	Histopathology service in coordination with other health facilities		1
2.9.1.2 Staffing	2.9.1.2	At least 2 Medical Technologist available and 3 lab staffs (1 Lab Technician, 1 Lab Assistant and 1 Helper) in each shift		1
2.9.1.3 Instruments and equipment	2.9.1.3.1	Instruments and equipment to carry out all parameters of tests are available and functioning (See Annex 2.9.1b Equipment and Instrument for Lab At the end of this standard)		3
	2.9.1.3.2	Instrument are maintained and calibrated as per manufacturer instructions		1
	2.9.1.	Quality control sera and standards are run regularly and record kept		1

2.9.1.4 Physical facilities	2.9.1.4.1	Separate space with working desk and chair designated for specific laboratory procedures like - hematology, biochemistry, microbiology, serology	1
	2.9.1.4.2	Light and ventilation are adequately maintained.	1
	2.9.1.4.3	Designated area well labelled for reception of sample and dispatch of reports	1
2.9.1.5 Duty rosters	2.9.1.5	Duty rosters of lab are developed regularly and available in appropriate location.	1
2.9.1.6 Facilities for patients	2.9.1.6.1	Waiting space with sitting arrangement is available for at least 15 persons in waiting lobby.	1
	2.9.1.6.2	At least one each male, female and universal toilet for patients using laboratory services with running water and wash basin	1
	2.9.1.6.3	Safe drinking water is available in the waiting lobby throughout the day.	1
2.9.1.7 Recording and reporting	2.9.1.7.1	Sample is adequately recorded with requisition form with detail information of patients	1
	2.9.1.7.2	Standard reporting sheets are being used and all reports are recorded in a standard register (HMIS 9.4).	1
	2.9.1.7.3	Report have adequate information of patient and checked by designated person before release	1
2.9.1.8 Supplies storage and stock	2.9.1.8.1	At least three months buffer stock of laboratory supplies is available.	1
	2.9.1.8.2	Reagents are stored at appropriate temperature in store and lab	1
2.9.1.9 Walking Blood Bank available	2.9.1.9	List of donor is available in laboratory for contact during emergency need of the blood	1
2.9.1.10 Infection prevention	2.9.1.10.2	Biohazard signs and symbols are used at appropriate places visibly	1
	2.9.1.10.3	All staffs know how to respond in case of spillage and other incidents	1
	2.9.1.10.4	Masks and gloves are available	1
	2.9.1.10.5	There are colored bins for waste segregation and disposal based on HCWM guideline 2014 (MoHP) and infectious waste is sterilized using autoclave before disposal	1
	2.9.1.10.6	Hand-washing facility with running water and soap is available for practitioners	1
	2.9.1.10.7	Needle cutter is used	1
	2.9.1.10.8	Chlorine solution and bleach is available and utilized for decontamination	1

Annex I: List of Subject Experts

- Roshani Laxmi Tuitui, Chief, Hospital Nursing Administrator, MoHP
- Dr Roshan Neupane, Chief Medical Superintendent, Myagdi District Hospital
- Dr Chuman Lal Das, Chief Medical Superintendent, Sagarmatha Zonal Hospital
- Ramkrishna Lamichhane, Under-Secretary, CSD/ MoHP
- Sangita Shah, Senior Drug Administrator, QARD, MoHP
- Krishna Subedi, Section Officer, CSD/MoHP
- Shrijana Shrestha, Chief, Environmental Health and HCWM Section, MD, DoHS
- Dr Runa Jha, Pathologist, National Public Health Laboratory, MoHP
- Uma Kumari Rijal, Nursing Officer, MoHP
- Bijaya Kranti Shakya, Sr. PHO, QARD, MoHP
- Kopila Shrestha Palikhey, Nursing Director, TUTH
- Dr Asha Thapa, Dental Surgeon, NAMS
- Dr Bhaskar M. M. Kayastha, Dermatologist, NAMS
- Dr Dhundi Paudel, ENT/ Audiologist, NAMS
- Dr Ravi Ram Shrestha, Chief Consultant Anesthesiologist, NAMS
- Dr Rajiv Jha, Neurosurgeon, NAMS
- Dr Saroj Sharma, Consultant Radiologist, NAMS
- Dr Peeyush Dahal, Consultant Burn/Plastic Surgeon, NAMS
- Dr Ashish Shrestha, Consultant Physician, PAHS
- Dr Rajesh Gangol, Palliative care specialist, PAHS
- Dr Ramesh Kandel, Consultant Geriatrician, PAHS
- Dr Nabees Man Singh Pradhan, Consultant Orthopedics, PAHS
- Dr Sanjay Paudel, Consultant Surgeon, PAHS
- Dr Anil Baral, Consultant Nephrologist, NAMS
- Dr Shanta Bir Maharjan, Consultant Surgeon, PAHS
- Mohan Poudel, Housekeeping and Laundry Incharge, PAHS
- Devi Shah, CSSD Incharge, PAHS
- Dr Ananta Adhikari, Psychiatrist, Patan Mental Hospital
- Dr Jageshowor Gautam, Director, Paropakar Maternity and Women's Hospital
- Asha Laxmi Prajapati, Nurse, Paropakar Maternity and Women's Hospital
- Dr Archana Amatya, Obstetrician and Gynecologist, TUTH/IOM
- Dr Harihar Wasti, Medico-legal Expert, TUTH/IOM
- Dr Ramesh Kumar Maharjan, Emergency Physician, TUTH/IOM
- Dr Ratna Mani Gajurel, Cardiologist, Manmohan Cardiovascular and Throic Centre, TUTH/ IOM
- Dr Rakesh Verma, Urologist, Human Organ Transplant Center
- Subhadra Regmi, Hemodialysis Nurse, Human Organ Transplant Center
- Dr Amir Neupane, Physiotherapist, AASHAH Health Care
- Dr Ben Limbu, Ophthalmologist, Til Ganga Eye Hospital
- Amit Kumar Shah, Radiographer, District Hospital Dhankuta
- Ambika Thapa, Technical Coordinator for MSS, MoHP, WHO Nepal/NSI/NHSSP

Annex II: List of Reviewers

- Dr Krishna Kumar Rai, Technical Advisor to Minister of Health and Population
- Dr Sushil Nath Pyakurel, Chief Specialist, MoHP
- Dr Guna Raj Lohani, DG, DoHS
- Narayan Prasad Dahal, DG, DDA
- Dr Vasudev Upadhyaya, DG, DoA
- Santa Bahadur Shrestha, Former Secretary of MoHP
- Dr Taranath Poudel, Medical Generalist, MoHP
- Dr Dipendra Raman Singh, Chief, QARD, MoHP (Chief, The Then CSD, MoHP)
- Dr Bhim Singh Tinkari, Chief, The then PHAMED, MoHP
- Mohammad Daud, Chief, Federalism Implementation Unit, MoHP
- Dr Bikash Devkota, Chief, Management Division, DoHS, MoHP
- Dr Madan Kumar Upadhyaya, Executive Director, Health Insurance Board
- Mahendra Shrestha, Advocacy Officer to Minister of Health and Population
- Roshani Laxmi Tuitui, Chief, Hospital Nursing Administrator, MoHP
- Dr Roshan Neupane, Chief Medical Superintendent, Myagdi District Hospital
- Dr Chuman Lal Das, Chief Medical Superintendent, Sagarmatha Zonal Hospital
- Ramkrishna Lamichhane, Under-Secretary, The Then CSD/ MoHP
- Sangita Shah, Senior Drug Administrator, QARD, MoHP
- Krishna Subedi, Section Officer, The Then CSD/MoHP
- Shrijana Shrestha, Chief, Environmental Health and HCWM Section, MD, DoHS
- Dr Arjun Sapkota, Chief, The then Quality Section, MD, DoHS
- Dr Basudev Pandey, Director NCASC, DoHS
- Dr Runa Jha, Pathologist, National Public Health Laboratory, MoHP
- Dr Punya Paudel, The then FHD, DoHS
- Uma Kumari Rijal, Nursing Officer, MoHP
- Bijaya Kranti Shakya, Sr. PHO, QARD, MoHP
- Dipak Raj Bhatta, PHI, DoHS
- Krishna Shrestha, NHTC, DoHS
- Kopila Shrestha Palikhey, Nursing Director, TUTH
- Dr Asha Thapa, Dental Surgeon, NAMS
- Dr Bhaskar M. M. Kayastha, Dermatologist, NAMS
- Dr Dhundi Paudel, ENT/ Audiologist, NAMS
- Dr Ravi Ram Shrestha, Chief Consultant Anesthesiologist, NAMS
- Dr Rajiv Jha, Neurosurgeon, NAMS
- Dr Saroj Sharma, Consultant Radiologist, NAMS
- Dr Bhupendra Basnet, Director, Bir Hospital
- Dr Ganesh Rai, Director, Kanti Children's Hospital
- Dr Dilip Sharma, Registrar, Nepal Medical Council
- Dr Ganesh Shah, Consultant Pediatrician, PAHS
- Dr Ashish Shrestha, Consultant Physician, PAHS
- Dr Bishnu Prashad Sharma, Director, PAHS
- Dr Arjun Acharya, Director, WRH, Pokhara
- Dr Rajesh Gangol, Palliative care specialist, PAHS
- Dr Ramesh Kandel, Consultant Geriatrician, PAHS

- Dr Nabees Man Singh Pradhan, Consultant Orthopedics, PAHS
